RE: PS Docket 15-91 Wireless Emergency Alerts

Dear Ms. Dortch:

On Wednesday, September 7, 2016, Dara Ung - Director of Systems Engineering, Comtech Telecommunications Corp. (Comtech), emailed the attached White Paper entitled "WEA Precise Geo-Targeting Using Hybrid Technology" to James Wiley of the Public Safety and Homeland Security Bureau of the Federal Communications Commission (FCC) for inclusion in the FCC's considerations in this docket.

The White Paper details that Comtech has developed a hybrid geo-targeting solution that uses both a network based geo-targeting algorithm (down to the cell sector level accuracy) and a mobile device application (capable of determining its own precise location) to perform precise geo-targeting for WEA alerts. No discussion regarding the White Paper occurred.

Pursuant to Section 1.1206 of the Commission's rules, 47 C.F.R. § 1.1206, this letter is being electronically filed via ECFS with your office and a copy of this submission is being provided to all FCC employees mentioned herein.

Please direct any questions as to this matter to the undersigned. Thank you.

Sincerely,

/s/

Kim Robert Scovill, Esq.
Vice President – Legal, Regulatory, and External Affairs
